

Space Planning + Design, All In Real-Time VR

Salamander Designs brings you turnkey resources for project design sessions from start to finish, using the innovative Virtual Reality (VR) software platform from Modus VR as one of our many business design and consultation services.

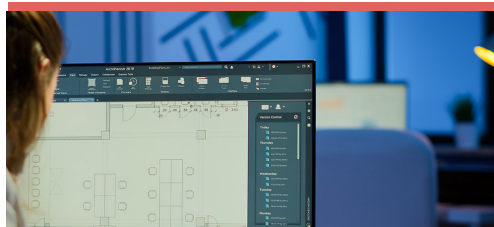

Ultra-Realistic Space Planning and Design, All in Real Time.

Salamander Designs offers complete design sessions from start to finish, using the innovative Virtual Reality (VR) software platform from Modus VR as one of our many business design and consultation services.

Live, Immersive Design Sessions

You and your clients simply join virtually, and you'll be able to design and move about your rooms while we work with you on each element including technology, décor, people, furniture and requirements.

Turnkey Deliverables

Within minutes after the live design session, we'll provide you photo-realistic renders, line drawings and URLs where you can experience 360-degree views on any computer or device.

Turn Ideas Into Reality In Minutes – Not Months

A/V integrators, space planners, builders and designers will experience a 360-degree, full "digital whiteboard" style meeting, where every aspect of a space and technology comes to life for discussion and faster decisions.

Schedule a Demo

You and your clients simply join us virtually and we will help design your space with the best technology furniture options.
